PROFESSIONAL SUMMARY

Frontend-focused Full-stack engineer focused on building scalable web applications using React, Next.js, TypeScript, and modern backend tooling. Experienced in contributing to startup products, building responsive user interfaces, integrating APIs, and shipping production-ready applications in collaborative environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Chakra UI, Radix UI

State & Data: TanStack Query, Zustand

Backend: Node.js, Prisma, PostgreSQL, MySQL

Authentication: JWT, OAuth, NextAuth

Tools: Git, GitHub, Vercel, Render, Recharts

Concepts: REST APIs, responsive design, component architecture, state management

WORK EXPERIENCE

Front-End Engineer — Echo, Lagos, Nigeria

October 2025 – Present

- Built and maintained scalable front-end features using React, TypeScript, and Tailwind CSS
- Collaborated with a cross-functional team to deliver features under real-world deadlines
- Translated product requirements into responsive, production-ready UI components
- Contributed to improving user experience through clean architecture and performance-focused development

Full-Stack Engineer / Co-Lead — Hebron Startup Lab, Covenant University

September 2024 – Present

- Coordinated technical sessions and collaborative initiatives within a startup-focused creator community
- Mentored student developers on frontend development, project structuring, and technical workflows
- Contributed to product ideation and team collaboration in fast-paced startup environments

PROJECTS

Echo — Social Impact Platform | <https://www.echo-ng.com/>

Tech: React.js, TypeScript, Tailwind CSS, REST APIs

- Led frontend implementation using React, TypeScript, and Tailwind CSS
- Built responsive and reusable UI systems for structured community feedback workflows
- Contributed to a platform launched within Covenant University, generating 3,700+ responses and an 89.1% acceptance rate

NextReel — Movie discovery Platform | <https://nextreel-orcin.vercel.app/>

Tech: React.js, TypeScript, Tanstack query, TMDB API, Tailwind CSS

- Built a movie discovery application using React, TypeScript, and the TMDB API
- Implemented infinite scrolling, debounced search, dynamic routing, and route-level error handling
- Managed asynchronous server state using TanStack Query for seamless data fetching and caching

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

September 2024 – Present

Covenant University, Ota.

Relevant Coursework: Software Engineering, Software Architecture and Organization, Database Management Systems, Operating Systems.

Achievement: First-Class Honours (CGPA: 4.94)

ACHIEVEMENTS

Interswitch Group Hackathon at Covenant University — 3rd Place Winner

- Secured **3rd place among 15 competing teams**
- Built a full-stack solution within a one-day timeframe under tight constraints
- Identified and addressed a key challenge in AI systems: **data selection and bias**
- Developed a system that improves dataset quality by leveraging structured processing and domain knowledge
- Integrated a payment gateway using Interswitch APIs for demonstration purposes
- Collaborated effectively within a team to deliver a polished, production-ready prototype under pressure
