WORK EXPERIENCE

Full-Stack Engineer, LeadSage Africa — PropTech (Lagos, Nigeria)

Apr 2026 — Present

- Developed and maintained scalable, responsive web applications for LeadSage Africa, a PropTech platform streamlining property discovery, digital leasing, and housing savings across Nigeria
- Built and enhanced product features using Node.js, Next.js, NestJS, TypeScript, and Tailwind CSS, translating Figma designs into high-quality, production-ready user interfaces
- Redesigned dashboards and optimized user workflows, improving usability, accessibility, and overall user experience across the platform
- Designed and implemented a scalable AI chatbot using Node.js, NestJS, Google GenAI (Gemini), Redis Cloud, and BullMQ, delivering personalized WhatsApp conversations with fast API response times
- Contributed to collaborative Git workflows through feature branching, pull requests, and code reviews, ensuring maintainable, reliable, and scalable software releases

Front-End Engineer, Echo (Lagos, Nigeria)

Oct 2025

- Developed and maintained scalable, responsive user interfaces for Echo, a social impact platform, using React.js, TypeScript, Tailwind CSS, and Framer Motion
- Architected reusable React components and implemented type-safe form validation with Zod, improving maintainability, consistency, and developer productivity across the application
- Optimized client-side data fetching and API state management using TanStack Query, delivering a smoother, more responsive user experience through efficient caching and synchronization
- Collaborated closely with product designers and backend engineers to translate requirements into intuitive, production-ready user experiences under agile development cycles
- Participated in collaborative GitHub workflows, including feature development, pull requests, code reviews, and cross-functional collaboration to deliver high-quality software releases

PROJECTS

Analytics — AI-Powered Learning Platform

Jul 2026

Full-stack platform helping aspiring data analysts gain practical, industry-ready experience through AI-generated projects.

- Architected a full-stack AI-powered learning platform using Next.js, TypeScript, Node.js, Prisma ORM, PostgreSQL, NextAuth, and Tailwind CSS with integrated AI features
- Engineered an AI-driven project generation system creating realistic analytics tasks with contextual mentorship and intelligent feedback, using real-world datasets from the World Bank Data API
- Designed a scalable application architecture featuring authentication, database management, cloud storage, and reusable component systems for long-term maintainability
- Built an interactive, high-performance landing page with Framer Motion, responsive design, and scrollytelling animations
- Implemented user progress tracking, personalized learning workflows, and performance analytics to provide measurable skill development

NextReel — Movie Discovery Web Application

- Developed a responsive movie discovery platform using React.js, TypeScript, Tailwind CSS, Zustand, TanStack Query, and the TMDB API
- Integrated multiple TMDB API endpoints to display trailers, cast details, reviews, ratings, and recommendations through efficient asynchronous data fetching
- Implemented infinite queries with TanStack Query to optimize content loading, caching, and API performance
- Engineered a debounced search experience with loading, error, and empty states, improving responsiveness and reducing unnecessary API requests

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Chakra UI, Radix UI, Framer Motion

Backend: Node.js, Express.js, NestJS, REST APIs, Prisma

Databases: PostgreSQL, MySQL, MongoDB

State Management & Data Fetching: Redux, Zustand, TanStack Query

Authentication: JWT, OAuth, NextAuth.js

Tools & Platforms: Git, GitHub, Figma, Vercel, Render

Core Concepts: Component Architecture, API Integration, State Management, Performance Optimization, Version Control

EDUCATION

B.Sc. Computer Science, Covenant University, Ota, Ogun State, Nigeria (First-Class Honours)
