

OBASAN TOMILOLA

Full-Stack Engineer · Lagos, Nigeria · Open to Remote

[Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Frontend: React.js · Next.js · TypeScript · JavaScript (ES6+) · Tailwind CSS · Chakra UI · Radix UI · Framer Motion

Backend: Node.js · Express.js · NestJS · REST APIs · Prisma

Databases: PostgreSQL · MySQL · MongoDB

State Management & Data Fetching: Redux · Zustand · TanStack Query

Authentication: JWT · OAuth · NextAuth.js

Tools & Platforms: Git · GitHub · Figma · Vercel · Render

Core Concepts: Component Architecture, API Integration, State Management, Performance Optimization, Version Control

EXPERIENCE

Front-End Engineer — Echo · Lagos · Nigeria · October 2025

- Developed and maintained scalable, responsive user interfaces for Echo, a social impact platform, using React.js, TypeScript, Tailwind CSS, and Framer Motion.
- Collaborated closely with product designers and backend engineers to translate product requirements into intuitive, production-ready user experiences while delivering features under agile development cycles.
- Architected reusable React components and implemented type-safe form validation with Zod, improving maintainability, consistency, and developer productivity across the application.
- Optimized client-side data fetching and API state management using TanStack Query, delivering a smoother, more responsive user experience through efficient caching and synchronization.
- Participated in collaborative GitHub workflows, including feature development, pull requests, code reviews, and cross-functional collaboration to deliver high-quality software releases.

Full-Stack Engineer — LeadSage Africa · PropTech · Lagos · Nigeria · April 2026 – Present

- Develop and maintain scalable, responsive web applications for LeadSage Africa, a PropTech platform that streamlines property discovery, digital leasing, and housing savings for users across Nigeria.
- Build and enhance product features using Node.js, Next.js, NestJS, TypeScript, and Tailwind CSS, translating Figma designs into high-quality, production-ready user interfaces.
- Redesign dashboards and optimize user workflows to improve usability, accessibility, and overall user experience across the platform.
- Contribute to collaborative Git workflows through feature branching, pull requests, code reviews, and team-wide code integration, ensuring maintainable, reliable, and scalable software releases.
- Designed and implemented a scalable AI chatbot using Node.js, NestJS, Google GenAI (Gemini), Redis Cloud, and BullMQ, leveraging background workers and queue processing to deliver personalized WhatsApp conversations while maintaining fast API response times.

PROJECTS

Analytica — AI-Powered Learning Platform · July 2026

- Architected and developed a full-stack AI-powered learning platform using Next.js, TypeScript, Node.js, Prisma ORM, PostgreSQL, NextAuth, Tailwind CSS, and AI integrations to help aspiring data analysts gain practical, industry-ready experience.
- Engineered an AI-driven project generation system that creates realistic analytics tasks, provides contextual mentorship, and delivers intelligent feedback using real-world datasets from the World Bank Data API.
- Designed and implemented a scalable application architecture featuring authentication, database management, cloud storage, and reusable component systems for long-term maintainability.
- Built an interactive, high-performance landing page with Framer Motion, responsive design, and scrollytelling animations to create an engaging product experience.
- Implemented user progress tracking, personalized learning workflows, and performance analytics to provide measurable skill development throughout the learning journey.
- Focused on clean architecture, reusable components, and modern engineering practices to deliver a production-ready application capable of scaling beyond an MVP.

NextReel — Movie Discovery Web Application

- Developed a responsive movie discovery platform using React.js, TypeScript, Tailwind CSS, Zustand, TanStack Query, and the TMDB API, delivering a modern, production-ready user experience.
- Integrated multiple TMDB API endpoints to display comprehensive movie information, including trailers, cast details, reviews, ratings, and recommendations through efficient asynchronous data fetching.
- Implemented infinite queries with TanStack Query to optimize content loading, caching, and API performance while delivering a seamless browsing experience.
- Engineered a debounced search experience with loading, error, and empty states, improving responsiveness and reducing unnecessary API requests.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

- Achievement: First-Class Honours · Covenant University, Ota, Ogun State, Nigeria.
